

# Syllabus

**B.Tech. First Year**

Semester A & B

Subject: Chemistry (CH10516)

Department of Chemistry  
Shri G S. Institute of Technology and Science, Indore (MP)

**B.Tech. I Year Chemistry**  
**Semester- A & B**  
**CH10516: CHEMISTRY**

Period/week			Credits			Maximum marks				
T	P	Tu	T	P	Tu	Theory		Practical		Total Marks
						CW	End Sem	SW	End Sem	
3	-	-	3	-	-	30	70	-	-	100

Program Outcomes (POs):

POs describe what students should know and be able to do at the end of the programme. POs are to be in line with the graduate attributes as specified in the Washington Accord. POs are to be specific, measurable and achievable. NBA has defined 12 POs.

**Graduates will be able to achieve:**

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, & an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, & analyze complex engineering problems reaching substantiated conclusions using 1st principles of math., natural sciences,& eng, sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge & research methods including design of experiments, analysis & interpretation of data, & synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select,& apply appropriate techniques, resources,& modern engineering & IT tools including prediction & modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment & sustainability:** Understand the impact of the professional engineering solutions in societal & environmental contexts,& demonstrate the knowledge of, & need for sustainable development.
8. **Ethics:** Apply ethical principles & commit to professional ethics & responsibilities and norms of the engineering practice.

9. **Individual & team work:** Function effectively as an individual, & as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community & with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give & receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge & understanding of the engineering & management principles & apply these to one's own work, as a member & leader in a team, to manage projects & in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Course Outcomes (COs): For Theory Course

Course outcomes are the statements of what a student should know, understand and/or be able to demonstrate after completion of a course.

**The course will enable student to:**

- CO1 Apply Specifications, testing and treatment of water for industrial and domestic use.
- CO2 Explain and compute different types of classical and alternative fuels.
- CO3 Illustrate Concepts, manufacturing and applications of different types of industrially important materials and their maintenance.
- CO4 Explain the applications of spectral and analytical techniques in qualitative and quantitative analyses.
- CO5 Apply the Ethics behind applying Chemical Methods in Industries and day-to-day use

**Pre-requisite:** Knowledge of basics of Chemistry studied in Class XI & XII.

**Course Objectives:** This course aims at imparting knowledge of the subject to the students for making them understand the role of chemistry in the field of engineering. The focus is on developing capabilities of students to use various analytical techniques, their applications in characterization of various materials used in different fields of engineering.

**Course Outcomes:** The course will enable student to understand:

- Basics of Organic, Inorganic and Physical Chemistry.
- Specifications, testing and treatment of water for industrial and domestic use.

- Concepts, manufacturing and applications of different types of industrially important materials and their maintenance.
- Applications of spectral and analytical techniques in qualitative and quantitative analyses.
- The students will understand the Ethics behind applying Chemical Methods in Industries and day-to-day use.

**Contents:**

**UNIT-I**

**Water:**

Source, Types of impurities and their effects, Hardness, its expression and determination, Boiler troubles and their causes, Analyses and treatment of water for industrial and domestic purposes, Alkalinity and its determination, IS Specifications for Water, Methods for disposal of waste water.

**Green Chemistry:** An overview

**Unit-II**

**Fuels and Combustion**

Introduction: Definition, Classification, Characteristics of a good fuel, Calorific Values, Gross & Net calorific value.

**Solid Fuels-** Determination of calorific value by Bomb Calorimeter, Theoretical calculation of calorific value by Dulong's method, Classification of Coal, Proximate and Ultimate analysis of coal, Numerical problems. **Liquid Fuels-** Petroleum; mining, refining and composition

**Gaseous Fuels-**Chemistry of Natural gas, LPG, CNG

**Alternative Fuels-** Overview of Bio-diesel, Hydrogen, Ethanol, Sustainable aviation fuel.

**UNIT-III**

**(a) Lubricants**

Introduction, Types of lubricants (liquid, Semi solid and solid) and principles of lubrication's, properties (test) of lubricants, cooling liquids and cutting fluids and their applications. Ethics code and Ethics management in the oil and lubricant industries.

**(b) Corrosion**

Introduction, Principle of corrosion, types of corrosion, factors affecting corrosion and methods of protection (Proper designing, use of inhibitors, use of pure metal, use of alloys). Ethics for corrosion prevention.

**UNIT-IV**

## Materials Chemistry

### (a) Polymers and Polymerization

Introduction, Classification, Types, methods of polymerization, mechanism, Structure-property Relationships, general applications of polymer materials of industrial importance (Nylon66, Kevlar, PVC, Polytetrafluoroethylene (PTFE) or Teflon, Polystyrene). Concept of Biodegradable polymers and their applications, Environmental regulations for polymer based packaging materials.

### (b) Nanomaterials

Introduction, synthesis, properties, nano-structured materials and their applications. Introduction to Smart materials and their applications.

## UNIT-V

### Instrumental Techniques and Applications

Introduction to Spectroscopy, Principal, Instrumentation and Applications of UV, IR and Atomic absorption spectroscopy(AAS). Introduction to Chromatography Techniques (Column, Paper, TLC), Advances in non-destructive methods and their unique applications.

**Assessment (Theory):** Attendance, class test, class assignments and end semester theory exam

### Books & References Recommended:

#### Text Books

1. Palanna O.G, Engineering Chemistry(Mc Graw Hill)
2. Dara S.S.,Engineering Chemistry (S. Chand publishing)
3. Stereochemistry: Conformation and Mechanism by PS Kalsi, New Age International Publisher
4. PC Jain and M Jain, Engineering Chemistry, 15th Edition, Dhanpat Rai publishing Co.
5. Chemistry in Engineering and Technology, JC Kuriacose and J Rajaram, Vol-I & II, Tata Mcgrow Hill Education Pvt. Limited.

#### Reference Books

1. D. Braun, Polymer Synthesis: Theory and Practice: Fundamentals, Methods, Experiments (Springer).
2. Ambasta B.K., Chemistry for Engineers( University Science Press)

**B.Tech. I Year Chemistry**  
**Semester- A & B**  
**CH10656: CHEMISTRY Laboratory**

Period/week			Credits			Maximum marks

-	2	-	-	1	-	-	-	20	30	50

**List of Experiments for B.Tech. I year, Chemistry**

**Course Outcomes (COs): For Laboratory Course:**

This laboratory course will illustrate the principles of chemistry relevant to the study of science and engineering. The students will learn to:

- CO1** Develop abilities to perform various types of qualitative and quantitative analyses .
- CO2** Determine properties of lubricants and oil samples.
- CO3** Analyse water samples for in terms of hardness, chloride content, alkalinity and other dissolved/un-dissolved impurities.
- CO4** Ability to understand, explain and use instrumental techniques for elucidating properties of lubricants oil samples ,chemical materials etc.
- CO5** Follow to good laboratory practices during performance.

**Group A**

1. Determination of the viscosity of lubrication oil by Redwood Viscometer no.1 (at five different temperatures)
2. Determination of flash point of given oil by Abel's apparatus
3. Determination of percentage of moisture in a coal sample
4. Determination of Steam Emulsification number (SEN) of a given lubricating oil sample
5. Determination of Total Solids in a water sample
6. Determination of flash point of given oil by Pensky Martin's apparatus
7. Determination of the viscosity of lubrication oil by Redwood Viscometer no.2 (at five different temperatures)
8. Determination of Aniline Point of a given oil sample

9. Determination of Drop Point of a given semi-solid lubricant
10. Determination of acid value of an oil sample
11. To study the chemical oscillations (Iodine Clock reaction)
12. Potentiometric estimation of Ferrous Ammonium Sulphate using standard Potassium Dichromate Solution
13. Determination of the partition coefficient of a substance between two immiscible liquids.
14. Synthesis of polymer and nanomaterials
15. Verification of Beer-Lambert's law by visible spectroscopy

### Group B

1. Determination of hardness of water sample by EDTA method
2. Determination of carbonates, bicarbonates and total alkalinity of a water sample
3. Determination of percentage purity of iron alloy by internal indicator method
4. Determination of percentage purity of iron alloy by external indicator method
5. Determination of chloride content of water

### Text Book

1. A Textbook of Quantitative Inorganic Analysis. AI Vogel, 3rd Edition, Longmans, London.
2. A Textbook On Experiments And Calculations In Engineering Chemistry, SS Dara, S. Chand Publisher

### Reference book

1. Vogel's Text Book of Quantitative Analysis, Ed. GH Jeffery, J Bassett, J. Mendham and RC Denny, Longmans, London

**CO PO Mapping Sheet for B.Tech. First Year Chemistry Theory (CH  
XXXXX)**
