

## Action Taken Report

Session 2023-24

During this academic year students were monitored through continuous evaluation on moodle platform and gaps were identified through regular mentor mentee meetings. Due to which the overall feedback given by the students at the end of the semester has been improved. Some of the actions taken are listed below and discussed with faculties.

1. Emphasis on providing more practice sessions for programming to solve real world problems using object oriented programming
2. To incorporate and utilize the advanced features and libraries in both Android and iOS applications, such as networking, location services, and multimedia handling, iOS development was integrated into the course
3. Expert lecture were delivered on how to follow SCRUM for implementing a project, how roles are assigned and followed in industry.
4. Design thinking was moved from 4th semester to 3rd semester, which emphasis on develop a fundamental understanding of the Design Process and it can be applied to innovation and creative problem-solving.
